

# HOT CHOCOLATE BOMBS

## INGREDIENTS & SUPPLIES

- Silicone sphere molds • Candy melts (Purple, pink, turquoise & blue) • Sprinkles (white & gold) • Wax paper
- Hot chocolate mix • Small marshmallows • Milk • 2 icing bags • Small microwave-safe plate & bowls • Spoon

## INSTRUCTIONS

1. In separate bowls, melt the purple and turquoise candy melts in microwave per package instructions.
2. Add spoonful of melted purple candy melts to half of the silicone molds and, working quickly, use back of spoon to cover mold. Repeat the process with the turquoise candy melts for the remaining molds.
3. Place the filled molds in the freezer to harden for 20 minutes.
4. Remove the molds and place them upside down on a piece of wax paper. Carefully pull back the mold to pop out each piece.
5. Warm microwave-safe plate for 30-45 seconds. Cleanup and straighten the edges of each half by placing the open side of the chocolate piece on warm plate for a few seconds, letting the edges melt and even out.
6. For each color, fill half of the pieces with a few spoonfuls of hot chocolate mix and some marshmallows.
7. Place an empty chocolate piece on the warm plate to melt the edges again, then place it on top of a matching colored piece that has hot chocolate and marshmallows to form a sphere.
8. Melt the remaining pink and blue candy melts in separate bowls, then place each color in an icing bag. (Be careful when handling the candy melts, as they will be hot.)
9. Add a decorative pink design on top of the purple hot chocolate bombs, then add white sprinkles. Add a decorative blue design on top of the turquoise hot chocolate bombs then add gold sprinkles.
10. Warm a glass of milk, add a hot chocolate bomb, and watch for a Shimmer and Shine surprise!
